

Ye Phone Kyaw (Zayden)

Software Developer

Calgary, AB, Canada | (368) 299-0067 | yephonekyaw920@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Detail-oriented software developer based in Canada with professional experience building scalable web applications. Proficient in React.js, Vue.js, Next.js, Node.js, TypeScript, ASP.NET Core (C#), with hands-on DevOps experience using Docker, Azure, AWS, GCP, and Digital Ocean. Passionate about clean code, OOP principles, containerized CI/CD pipelines, and cloud-based solutions.

TECHNICAL SKILLS

Languages	HTML, CSS, JavaScript, TypeScript, C#
Databases	MySQL, PostgreSQL, Oracle, MongoDB, Firestore, Firebase Realtime DB, Redis
API Development	RESTful APIs, GraphQL APIs, Stripe Payment Integration, JWT Authentication
Frameworks & Libraries	React, Next.js, Vue.js, React Native, Vite, Tailwind CSS, Node.js, Express.js, ASP.NET Core, Entity Framework Core, MAUI, Blazor, Axios, Zustand, Stripe.NET, SignalR, Nodemailer, GSAP, Genkit, EJS
Cloud & DevOps	AWS (EC2, ECS, S3, RDS), Terraform, Digital Ocean, Nginx, PM2, DNS Configuration, Netlify, Vercel, Railway, Docker, GitHub Actions CI/CD, Makefile
Tools & Platforms	Git, GitHub, xUnit, Playwright, Jest, Cypress, Mocha, Chai, Postman, Figma, Jira, Slack, Visual Studio, Visual Studio Code, Cursor, Word, Excel, PowerPoint, Teams
Soft Skills	Communication, Teamwork, Initiative, Creativity, Adaptability, Problem solving, Time management, Critical thinking

EDUCATION

Southern Alberta Institute of Technology (SAIT) Calgary, Canada	Sep 2023 – Dec 2024
Diploma in Software Development	
Technological University Maubin, Myanmar	May 2016 – Dec 2020
Bachelor of Civil Engineering	

WORK EXPERIENCE

BlueJarvis Technologies Inc, Calgary (Full-Stack Developer)	Aug 2025 – Feb 2026
- Built rules-based recommendation engine integrating third-party jobs APIs, Elasticsearch, and Google Gemini Genkit to process form submission and surface AI-assisted, structured results. - Developed authenticated RESTful HTTP endpoints and callable Cloud Functions connection AWS SES, LinkedIn OAuth, partner API, and Google Analytics Data API into reactive serverless backend. - Implemented application security using Firebase Authentication custom claims for role-based access control, and global route middleware enforcing admin-only access across all SPA surfaces. - Implemented interactive analytics dashboards with ApexCharts featuring real-time data, date filtering, and responsive layouts and optimized backend processing with scheduled aggregation and caching strategies. - Wrote comprehensive unit tests using Mocha, Chai and Sinon for Cloud Functions, authored Playwright E2E tests with global setup/teardown to ensure UI workflows run flawlessly. - Containerized the development environment with Docker and Makefile-driven emulator workflows; configured Firebase Hosting multi-target deployments (staging/production); enforced code quality with Husky pre-commit hooks, ESLint, and Prettier.	

PROJECTS

Rosa E-Commerce Platform Check here	May 2026 – June 2026
Built a full-stack e-commerce platform with ASP.NET Core Web API (C#) with Next.js (TypeScript), featuring product search with debounced autocomplete, category filtering, price sorting, and load-more pagination using dynamic LINQ queries	

- Implemented secure cookie-based JWT authentication (httpOnly cookies, BCrypt hashing), Stripe payment processing with webhook signature verification, and real-time order status update via SignalR Websocket
- Designed a relational MySQL database with Entity Framework Core modeling interconnect tables with auto-migration on startup
- Developed a responsive Next.js storefront using Tailwind CSS, Zustand state management, and reusable custom hooks with protected route guards and cart badge sync
- Containerized with Docker multi-stage builds and Docker Compose, deployed to AWS EC2 with Elastic IP, and configured GitHub Actions CI/CD for automated build and deployment via SSH

Z-Recipes | [Check here](#)

Jun 2025 – Jul 2025

- Developed a production full-stack recipe management application using the MERN stack (MongoDB, Express.js, React, Node.js) with TypeScript for end-to-end type safety.
- Engineered a RESTful API with Node.js to handle full CRUD operations, utilizing MongoDB for flexible data modelling of recipes and user data.
- Built a modern, responsive user interface with React, leveraging Tailwind CSS for rapid, utility-first styling and a clean, maintainable design.
- Implemented recipe feed with server-side pagination to efficiently display and browse content, sorted by creation time for a modern feed-like experience.
- Deployed on Digital Ocean configuring Nginx as a reverse proxy, PM2 for process management, and DNS routing to a custom domain.

Personal Portfolio | [Check here](#)

Feb 2025 – Mar 2025

- Developed a modern personal portfolio using React and Three.js to showcase technical projects through immersive 3D graphics.
- Implemented 3D scene rendering and animation using React Three Fiber (R3F) and GSAP libraries.
- Utilized Tailwind CSS for responsive styling and optimized 3D performance across mobile and desktop devices.

Muzic – Mobile Music Player | [Check here](#)

Sep 2024 – Dec 2024

- Implemented a cross-platform mobile application with React Native and TypeScript to ensure type safety, reduce bugs, and improve code maintainability.
- Integrated a third-party API to stream music; implemented core features including play/pause, next/previous track, search, and favorites list.

Employee Scheduling System | [Check here](#)

May 2024 – Aug 2024

- Developed a full-stack scheduling web application as capstone project with React and Vite for dynamic UI, and Node.js, Express.js, and PostgreSQL to manage user data and shift logic.
- Fostered open communication and collaboration with team members in an agile environment, participating in code reviews to maintain code quality and optimize performance.
- Designed and implemented a RESTful API and troubleshooted bugs across the application to ensure a stable and reliable user experience.

ACHIEVEMENT

YYC Hacks [First Place] | [Check here](#)

Feb 2024

- Demonstrated creativity and rapid problem-solving in a high-pressure, 24-hour hackathon.
- Contributed to a collaborative team effort from concept to demo, securing first place for an award-winning application.
- Defined extension properties and permissions, enhancing Chrome browser functionality with an AI-built-in chatbot.

VOLUNTEER EXPERIENCE

Empowered Futures (Full-Stack Developer) | [Check here](#)

Jul 2025 – Present

- Contributing to full-stack development by building responsive frontend features, developing and consuming RESTful APIs, and ensuring code quality through peer code reviews.
- Operating within a professional agile framework, collaborating across teams and contributing to the development and maintenance of containerized applications.
