

Ye Phone Kyaw (Zayden)

Software Developer

Calgary, Alberta, Canada | (368)-299-0067 | yephonekyaw920@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

A motivated and detail-oriented Software Developer with a diploma in Software Development from SAIT and hands-on experience in Web Development and Mobile Development. Eager to apply my technical skills in React, Node.js, and TypeScript to a mission-driven organization. I am passionate about writing clean, scalable code and leveraging OOP principles to solve real-world problems and eager to learn modern technologies, frameworks, and keen to collaborate with a team to ship high-quality software.

PROJECTS EXPERIENCE

Z-Recipes – Full Stack Recipe Platform

June 2025 – July 2025

- Developed a full-stack recipe management application using the MERN stack (MongoDB, Express.js, React, Node.js) with TypeScript for end-to-end type safety.
- Engineered a RESTful API with Node.js to handle full CRUD operations, utilizing MongoDB for flexible data modeling of recipes and user data.
- Built a modern, responsive user interface with React, leveraging Tailwind CSS for rapid, utility-first styling and a clean, maintainable design.
- Implemented a central recipe feed with server-side pagination to efficiently display and browser user-submitted content, sorted by creation time for a modern, feed-like experience.

Muzic (Music Player) - Mobile App

Sep 2024 – Dec 2024

- Implemented a cross-platform mobile app in React Native, using TypeScript to ensure type safety, reduce bugs, and improve code maintainability.
- Integrated a third-party API to fetch a stream music, implementing core functionalities such as play, pause, next/previous track, and search
- Designed and implemented a user-friendly interface with a custom audio player, playlist management, and a favorite list feature
- Conducted thorough testing and debugging the codebase to ensure smooth user experience across both iOS and Android platforms

Employee Scheduling System - Full Stack Web App

May 2024 – Aug 2024

- Developed a full-stack scheduling web application with React.js and Vite, enabling dynamic UI and built with Node.js, Express.js, and PostgreSQL to manage user data and shift logic.
- Fostered open communication, and collaboration with team members in an agile environment, participating in code reviews to maintain code quality and optimize performance.
- Designed and implemented a RESTful API and troubleshoot bugs across the application to ensure a stable and reliable user experience.
- Containerized the app using Docker for seamless deployment. Wrote unit tests for components with Jest to ensure functionality and prevent regressions and performed API testing with Postman for 100% endpoint reliability.

Pet Care – Full Stack Pet Adoption Platform

Oct 2023 – Dec 2023

- Built a responsive web application enabling users to browse and adopt cats and dogs, integrating external APIs for real-time pet data.
- Implemented secure user authentication and authorization using Firebase Authentication, ensuring a safe and personalized experience.
- Designed and managed pet listings and user data with Firestore, supporting real-time updates and persistent storage.
- Developed and executed end-to-end tests with Cypress to validate critical user flows, such as registration and adoption, ensuring a reliable and bug-free application.

ACHIEVEMENT

YYC Hacks (First Place) Feb 2024

- Demonstrated creativity and rapid problem-solving in a high pressure, 24-hour hackathon.
- Contributed to a collaborative team effort from concept to demo, securing First Place for our award-winning application.
- Defined extension properties and permissions, enhancing Chrome browser functionality and Ai built-in chatbot.
- Designed and implemented a user-friendly popup interface using HTML, CSS, JavaScript for intuitive navigation

VOLUNTEER EXPERIENCE

Full Stack Developer – Empowered Future July 2025 - Present

- Selected as a volunteer Full Stack Developer to help build and enhance mission-critical web application using React, Node.js and TypeScript.
- Will contribute to full-stack development by building responsive frontend features, developing and consuming RESTful APIs, and ensuring code quality through peer code reviews.
- Set to operate within a professional agile framework, collaborating across teams and contributing to the development and maintenance of containerized applications.

EDUCATION

Southern Alberta Institute of Technology (SAIT) Sep 2023 – Dec 2024

Diploma in Software Development

Technological University – Maubin May 2016 – Dec 2020

Bachelor of Civil Engineering

TECHNICAL SKILLS

Programming Languages

HTML, CSS, JavaScript, TypeScript, Java, C#, PHP, Python

Databases

Relational Databases: MySQL, PostgreSQL, Oracle | Non-Relational Databases: MongoDB, FireStore

API Development

RESTful APIs, GraphQL APIs

Libraries & Frameworks

React, Next.js, React Native, Tailwind CSS, Node.js, Laravel, .NET, GSAP, Numpy

Tools & Platforms

GitHub, Git, Netlify, Vercel, Docker, Jest, Cypress, Postman, Figma

Microsoft Office

Teams, Outlook, Word, Excel, PowerPoint

Soft skills

Communication, Teamwork, Initiative, Creativity, Adaptability, Problem Solving, Time Management
